in dimensional glass

UltraGlas signage

Memorable alternatives to more traditional signage solutions — UltraGlas provides architects, interior and graphic designers and signage professionals with remarkable signage versatility. UltraGlas allows the combination of design (including very specific typography and artwork), texture and color, in opaque or translucent options, to achieve signage elements that are truly unique. UltraGlas dimensional undulations play beautifully with natural and artificial light.

A vast menu of possibilities — in addition to incorporating typographic and/or other corporate graphics, UltraGlas may be produced in sizes up to 69-1/2" x 119-1/2", in virtually any shape and thickness, in a variety of glass colors, with applied and/or fired-in colors, etched and/or frosted surfaces and other finishes — many unusual materials may even be applied to UltraGlas. Please visit UltraGlas.com to see examples.

UltraGlas is always eager to work with discerning design professionals in the creation of unique architectural glass applications — how may we help you?
