Subtle
ArchiTextures
from
UltraGlas!

"UltraSweep," one of the many subtle glass ArchiTextures available only from UltraGlas Inc.

Standard UltraGlas® ArchiTextures (select textures shown) — these are the more subtle of UltraGlas textures, with the surface nearly smooth on the untextured side. These textures are often used alone, for a sophisticated, neutral effect — or as backgrounds for more dimensional textures or designs. Available in all glass thicknesses, glass tints, in specified shapes, and in sizes up to 6'-6" x 10'-6".

Please visit UltraGlas.com to view images of all UltraGlas Textures and lots of usage examples — call, write or fax should you like to acquire samples, literature or additional information.
